Box No. II	Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
This international reasons:	tional search report has not been established in respect of certain claims under Article 17(2)(a) for the following
1.	Claims Nos.:
	because they relate to subject matter not required to be searched by this Authority, namely:
2. X	Claims Nos.: 1-9 (in part)
	because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
·	Claims 1-9 encompass a broad range of compounds that are not fully supported by the description and which cannot be searched economically across the full breadth of these claims. Accordingly, the search has been largely restricted to compounds for which there is descriptive support, namely the exemplified compounds.
ļ <u>-</u>	Claims Nos.:
· h	because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)
Box No. III	Observations where unity of invention is lacking (Continuation of item 3 of first sheet)
This Interna	tional Searching Authority found multiple inventions in this international application, as follows:
•	
	As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
_, _	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
	As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4.	No required additional search fees were timely paid by the applicant. Consequently, this international search report is estricted to the invention first mentioned in the claims; it is covered by claims Nos.:
•	
Demonstr	Dunada and Company
Remark on l	The additional search fees were accompanied by the applicant's protest.
	No protest accompanied the payment of additional search fees.

Box No. IV Text of the Abstract (Continuation of item 5 of the first sheet)

A compound of the general formula

$$W^{Q} \xrightarrow{A^{N}} X_{1} \xrightarrow{X_{2}^{N}} X_{3}$$

or pharmaceutically acceptable prodrugs, salts hydrates, solvates, crystal forms or diastereoisomers thereof, wherein A represents a variety of six membered nitrogen containing heterocyclic rings, Q is a bond, halogen, C_{1-4} alkyl, O, S, SO₂, CO or CS and X_1 , X_2 , X_3 and X_4 are optionally substituted carbon wherein one is substituted by 9 specific substituents or one can be nitrogen. Compositions comprising a carrier and at least one compound of the above formula are also compound of the above formula and methods of suppressing the immune system of a subject by administering a compound of the above formula. I
